

RES provide the most comprehensive equipment commissioning and independent third party compliance testing available in industry.

Guarantee your new and rebuilt installations with these services:

- Pre start LASER ALIGNMENT verification
- Baseline VIBRATION testing
- MOTION AMPLIFICATION surveys using IRIS-M
- Baseline mechanical and electrical THERMOGRAPHY
- BALANCING grade assessments
- Pre and post installation Industrial NOISE testing to the Australian Code of Practice
- ULTRASONIC LEAK DETECTION for pressurised gas systems
- Workplace LIGHTING SURVEYS to the Australian Code of Practice

RES will provide you with a comprehensive Engineering report to assess the quality and condition of your installation and review the test results against any Client and OEM specifications and relevant Statutory requirements.

Contact us to discuss your project needs.

About Rotating Equipment Services

RES are South Australia's only locally owned and operated Reliability Engineering company.

Founded in 1997, we have performed work in all states of Australia and overseas.

Our business is proudly founded on two key principles:

- All of our services are provided by degree qualified, Professional Engineers.
- We are the only completely independent and locally owned organisation in our field in SA.

We are committed to providing all of our clients with the highest standards of unbiased professional advice, condition monitoring, diagnostic testing and Reliability Engineering services.
